

3. Funding for IAS work as part of habitat rehabilitation can be applied from the Ministry of the Environment's Helmi programme

The Ministry of the Environment's "Kunta-Helmi" funding can be applied for IAS control if it is part of a rehabilitation or restoration project of a valuable habitat, or of a field survey or planning work supporting such project.

Do this

Find habitats where restoration requires also IAS control, that are eligible for the Helmi programme.

Include IAS control work with expenses in the project application.

The next call for applications will be in January 2024.

Benefits of the action

Helmi funding enables the combating of harmful IAS from valuable habitats, and vicinity thereof, in the municipality area.

More information

You can find more information on calls for applications for the Kunta-Helmi funding on websites of the ELY Centres:
