

5. Leader funding has enabled many invasive species projects in Finland

Ihmisten kokoisille ideoille!

Municipalities, associations, foundations and companies can apply for Leader funding for non-profit projects, including IAS activities.

Depending on the project, funding can cover 20% to 100% of the costs.

You can find more information from a Leader group in your region.

Do this

Find your local Leader group and get to know the application instructions.

Find out if it is possible to implement project-based IAS activities, preferably in collaboration with citizens, associations or companies.

Try to develop long-term operations that will continue after the project.

Benefits of the action

The municipality can perform IAS work with project funding while deepening its collaboration with local citizens and other local operators.
